

FIG. 1

FIG. 2

FIG. 2 is a perspective view of a rectangular block 21. A central vertical shaft 20 is shown passing through the block. The top surface of the shaft is labeled 21d. A curved arrow indicates rotation around the shaft. A dashed line 13 passes through the block, with a small component 52 at the top and a larger component 13 at the bottom. A large arrow points to the left, indicating a direction of movement or force. The block is surrounded by a dashed line representing a boundary or flow.
